

The Power of Data in Climate Science

Workshop hosted by the Christa McAuliffe Center

Monday, October 16

4:30 PM – 6:00 PM

**McCarthy Center, Alumni Room
Framingham State University**

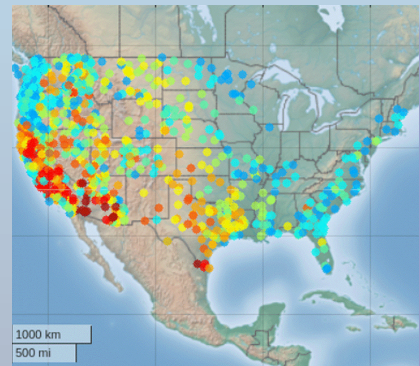

For high school and college students and all educators

In this session, you will explore...

How scientists and engineers are utilizing MATLAB and Simulink to conduct cutting-edge research in the field of climate science.

How these powerful tools can aid in the analysis of climate data and help to answer questions such as: *"Is the Amazon rainforest disappearing?"* and *"What is a heatwave?"*

Explore and visualize data hands-on using these tools.
